

QMC Hospital - Nottingham

**Year 2008**

This new healthcare facility demanded chilled beams with a proven record of application in healthcare environments, and for this reason Frenger's Pilot I-60 Healthcare active chilled beam was selected. The Pilot I-60 Healthcare chilled beam has undergone extensive testing for its performance and suitability and has subsequently been supplied to a number of large hospital projects throughout the UK. The product has been optimised to comply with the latest infection control guidelines and furthermore has been proven to deliver comfortable internal conditions whilst in both cooling and heating modes.
